

Math 308 Section D
Linear Algebra with Applications

- Instructor:** Dustin Moody
E-mail: dbm25@math.washington.edu
Office: C-430 Padelford
Office Hours: Mon/Wed/Fri 9:30-10:20
I am available at other times by appointment. Just send me an email or drop by.
- Text:** Introduction to Linear Algebra by Johnson, Riess, and Arnold
We will cover chapters 1,3, and 4. (Chapter 2 is review material).
- Website:** www.math.washington.edu/~dbm25
- Homework:** See the class schedule for a complete listing of the assignments and their due dates. Homework is due weekly, collected in class on the day it is due. You can always turn it in earlier, **but not later**. The lowest homework score will be dropped. It is essential that you do the homework to learn the material—just listening and reading will not suffice.
- Midterms:** The first midterm is on Monday, April 20th, and the second one is on Friday, May 15th. These will take place during regular class hours. You can use a scientific calculator, but not a graphing calculator.
- Final:** The final will take place in class at the university scheduled time. This is on Monday, June 8th, from 8:30-10:20 am.
- Grading:**
- | | |
|------------|-----------|
| Homework | 20 % |
| Midterms | 25 % each |
| Final Exam | 30 % |
- Time conflicts:** If you have a time conflict with an exam, then it is your responsibility to make arrangements ahead of time. Otherwise there will be no make-up. (Exceptions are possible in the rare case of an emergency).
- Technology:** I encourage you to learn to use technology to assist you in this class. However, you will need to be able to do problems by hand for the exams.
