

University of Washington
Math 125 D and E
Spring 2014
General Information

Instructor:

Ethan Devinatz
Padelford C-554
phone: 685-4777
e-mail: devinatz@math.washington.edu
web: <http://www.math.washington.edu/~devinatz>

Office hours: Monday 5:00–6:00, Wednesday 4:00–5:00, and by appointment. (I may have to rearrange my office hours some weeks.) My office hour on Wednesday will be in the Math Study Center in Communications B-014. The Math Study Center is open at least 40 hours per week and is a good place to go for help with the coursework. You are encouraged to make use of this resource.

Your TA will announce his/her office hours in quiz section.

Text: *Calculus*, by James Stewart. This is a custom edition available at the University Bookstore. and covers the material in Math 124/5. It contains some of the chapters in Stewart's *Calculus, 7th Edition, Early Transcendentals*, so you may use that book instead.

You will also need a scientific calculator for the homework, but *no calculators will be allowed on tests*.

Homework: We will be using Webassign for the homework assignments. To link to Webassign, go to the “Math 125 Materials Website” at <http://www.math.washington.edu/~m125/>; you can also link to the Math 125 Materials Website from my website. There will also be information there about obtaining the “Webassign access code”. Homework assignments will be due more or less weekly; the due dates for each assignment will be listed on Webassign. Please note that each week's homework assignment will likely consist of several parts, and I will try, after each lecture, to post—see “Assignments and Announcements” on my website—a list of the problems from your homework assignment that you should now be able to do.

For most Webassign problems, you will be allowed 5 attempts. However, on multiple choice questions with 2,3, or 4 choices, you will be allowed only 1 attempt; and on multiple choice questions with 5 or more possible answers, you will be allowed 2 attempts.

Worksheets: On most Thursdays, you will be doing a worksheet in quiz section, and that will be handed in at the end of class. (Please bring a copy of the relevant worksheet to quiz section each Thursday, but *do not work through it beforehand*). You will find the worksheets on the Math 125 Materials Website.

Exams: There will be *two midterm exams*, given in quiz section Thursday, April 24 and Thursday, May 22. I reserve the right to change (under exceptional circumstances) exam dates; ample notification will be given. The *final exam* is a common final and is scheduled for Saturday, June 7 from 1:30–4:20. The room will be announced later.

No make-up exams (except for the final) will be given. Only under unavoidable emergencies (e.g., illness, death in family), which should be documented, will you be allowed to miss a midterm exam without penalty. Normally, such an absence from the final exam (provided the make-up cannot be taken) will result in a grade of Incomplete, assuming you are doing passing work at the time. In certain other situations (e.g., athletic meets, religious observances), it may be possible to take an exam early. This must, however, be set up at least 10 days in advance.

Please keep your old exams in case there are any future questions related to your course grade.

Finally, note that *photo identification* may be required for the midterm and final exams.

Grading:

Homework and Worksheets: 15%

Midterms: 45%

Final: 40%

The grade of I (incomplete) will be given only under the conditions in the *University of Washington General Catalog* (under "Grading Systems").
