## FROM SYMMETRY TO GROUPS, HOMEWORK 2

Problem 1. Let $\vec{v}=\left[\begin{array}{l}\mathrm{a} \\ \mathrm{b}\end{array}\right], \vec{w}=\left[\begin{array}{l}\mathrm{c} \\ \mathrm{d}\end{array}\right]$ be two vectors. Prove that $\vec{v}$ and $\vec{w}$ are perpendicular if and only if $a c+b d=0$.
