

Name _____

[Assuming that you have worked out the details of your unit during class, this write-up should take about 45 minutes or less. Please type or hand-write *extremely* neatly and clearly.]

My Assigned CMP Investigation is called _____

Answer these questions about your assigned unit. Use additional paper if needed.

The main mathematical ideas presented in this unit are:

What new mathematical vocabulary is introduced in this unit?

What is the key activity? Why is it key?

Looking at the problems that the students are assigned in the unit:

- What are the 2 or 3 most important problems for teaching a student the new ideas? Why do they teach the new ideas?
- What are the 2 or 3 most important problems for assessing whether a student really understood the content of this unit? Why are they good assessments?

What is the best feature of this unit? What do you like about it?

What problems or difficulties would you anticipate students having with this activity?
