**I. Reading:**

- Read do Carmo, Section 4-5.

**II. Required problems:**

1. Redo each problem from the midterm exam that you didn't attempt, or that you attempted and on which you earned fewer than 8 points. When you turn in your assignment, *turn in your graded exam with it!* [Note: Property (b) in Problem 1 should read "$|E_v| < 2\sqrt{EG}$ everywhere in $U$."]
