

# Quiz One Solutions

MATH 120A SPRING, 2002

1 These are functions:

These are *not* graphs of functions, as they fail the vertical line test:

2 The point  $A$  has coordinates  $(-10, -14)$  (in feet), and the point  $B$  has coordinates  $(0, 6)$ , so the distance from  $A$  to  $B$  is given by

$$d = \sqrt{(-10 - 0)^2 + (-14 - 6)^2} = \sqrt{(-10)^2 + (-20)^2} = \sqrt{500} = 10\sqrt{5} \approx 22.36 \text{ feet.}$$

3 The golf ball travels at 3 feet per second, so it covers  $10\sqrt{5}$  feet in  $10\sqrt{5}/3 \approx 7.45$  seconds.

4 The circle has center  $(0, 0)$  and radius 6, so it has equation  $x^2 + y^2 = 36$ . The line passes through  $A = (-10, -14)$  and  $B = (0, 6)$ , so it has equation  $y = 2x + 6$ . These two curves intersect when

$$x^2 + (2x + 6)^2 = 6^2,$$

or when  $x = 0$  (at  $B$ ) or when  $x = -24/5 = -4.8$ . Thus the point  $C$  has coordinates  $(x, y) = (-4.8, -3.6)$ .
