$\begin{array}{c} {\rm UW} \ {\rm Math} \ {\rm Circle} \\ {\rm _{Homework}} \end{array}$

1.	There are 24 Geodudes,	31 Gravelers and 22	Golems in a field.	Everytime two
	different evolutions meet,	they each evolve into	the third evolution.	If you let all of
	the pokémon roam foreve	r, will there ever be o	nly one evolution lef	t?

2. Ninetails desperately needs to know if 31 is a sum of three cubes. Remember, cubes can be positive or negative!
