## EXTRA PROBLEMS VI

1. Emma would like to buy 9 chocolate bars, but she is \$3 dollars short. If she buys 5 chocolate bars, she'll have \$5 left. How much is each chocolate bar?

2. A turtle and a rabbit are racing each other. It takes the turtle 9 hours to crawl 4 meters. With his nap, it takes the rabbit 11 hours to crawl 5 meters. Which will win the race?
